

## **AIS Network Can Help Your Agency Get in Compliance with New Insurance Data Security Act**

In anticipation of the upcoming compliance deadlines associated with the **Virginia Insurance Data Security Act of 2020**, whether you're reviewing and updating your current approach to security or just beginning your journey toward meeting the law's requirements, AIS Network can help.

Performing an information security risk assessment, implementing a comprehensive information security program and documenting an incident response plan are required by the law, which will be enforced by the SCC. AISN can assist Virginia insurance agencies in achieving all of these requirements and more.

Contact AISN for a free consultation:
